SunTek® Window Films Introduces CarbonXP™ Automotive Film

Martinsville, VA, August 30, 2010 – Commonwealth Laminating & Coating, Inc. / SunTek® Window Films has launched a Next Generation automotive window film, CXP™ (Carbon XP™). Manufactured with the latest in non-metal, nano-hybrid technology, CXP offers all the benefits of the company's popular Carbon line, including ease of installation, great color that will not fade, superior clarity, and non-interference properties but with 10% - 15% better solar performance.

CXP is available in seven (7) VLT's – 5%, 18%, 35%, 45%, 55%, 70% and 80%. The product is backed by a Lifetime Warranty that includes peeling, cracking, adhesive failure, and fading.

CXP will be featured at this year's SEMA Show in Las Vegas along with the company's updated automotive program and exciting new promotional materials. In addition, SunTek will host its Annual Dealer Appreciation Party at the Bellagio Hotel on November 3rd. This year promises to be even more exciting with more giveaways, a full buffet dinner and open bar! To receive an entry form for our drawing for free prizes and film, stop by booth #11925 in the North Hall.

For more information on CXP or any of SunTek's product lines, please visit www.suntekfilms.com or contact your nearest SunTek distributor.

Commonwealth Laminating & Coating, Inc / SunTek® Window Films is a manufacturer and distributor of professional automotive, architectural, and safety and security window films, as well as high-quality economy and specialty products.
