SunTek® Introduces Exterior Silver Film to Architectural Line

Martinsville, VA, April 4, 2011 – Due to the increasing demand for exterior film applications when traditional interior films are not feasible, SunTek has added Silver Exterior 20 (SXT 20) to its architectural product line.

Designed specifically for exterior applications, SXT 20 will help lower a building's energy costs and minimize heat build-up by blocking up to 82% of the sun's heat. Popular for commercial applications, this film is scratch-resistant and utilizes a pressure-sensitive adhesive.

For more information, please visit www.suntekfilms.com or contact your nearest SunTek distributor.

SunTek® Window Films is a manufacturer and distributor of professional automotive, residential/commercial and safety & security window films as well as high-quality economy and specialty products.
