## SunTek® Window Films Releases TruCut™ Software with Paint Protection and Window Film Patterns – California Distribution Center Now Open

**Martinsville, VA, August 1, 2012** – Commonwealth Laminating & Coating, Inc. / SunTek® Window Films has released the latest version of TruCut™, SunTek's exclusive paint protection and window film cutting software.

TruCut allows its user to quickly and easily cut a paint protection or window film pattern with minimal product waste. TruCut also features accurate editing capabilities, allowing the manipulation of any pattern to fit specific install requirements.

TruCut is pre-loaded with an extensive library of precise vehicle patterns, including 2013 models, and is available with both paint protection patterns and window film patterns or sold separately.

CLC is also proud to announce the opening of SunTek California, the company's newest distribution center in Anaheim, California. SunTek California opened in July to provide SunTek's exceptional customer service and support to the local California market. For more information regarding the SunTek California distribution center, please call 888-437-1664.

For more information on SunTek's TruCut software or any of SunTek's product lines, please visit [www.suntekfilms.com](http://www.suntekfilms.com) or contact your nearest SunTek distributor.

Commonwealth Laminating & Coating, Inc / SunTek® Window Films is a world-class manufacturer of solar control window films and precision, high-performance coatings on flexible film substrates and laminates. With a core competence in materials science, CLC offers unique and innovative solutions for the renewable energy products industry. Founded in 1995, CLC is headquartered in Martinsville, Virginia, U.S.A., combining a state-of-the-art manufacturing facility, proprietary and highly technical processes, efficient global distribution capabilities, and flexible work force to produce a broad range of high quality products.

CLC maintains operations in ten locations and six countries around the world; its sole manufacturing facility is located in Martinsville, Virginia, U.S.A. All CLC products are made at this facility on the industry's newest and most advanced manufacturing equipment. Additionally, CLC's technical and responsive team is focused on developing cutting-edge and innovative technology to meet the evolving needs of the industry.
