SunTek® Window Films Introduces CarbonXP™ Automotive Film

Martinsville, VA, April 7, 2010 – Commonwealth Laminating & Coating, Inc. / SunTek® Window Films has launched a new automotive window film line, CarbonXP™ (CXP). CXP is now the highest-end automotive window film that SunTek manufactures.

CXP offers all the benefits of the company's popular Carbon line, including ease of installation, great color that will not fade, superior clarity, and non-interference properties. In addition to all of these attributes, CXP has significantly better solar performance than the Carbon line, ranging from 10-15% better.

Manufactured with the latest in non-metal, nano-hybrid technology, CXP is available in seven (7) VLT's – 5%, 18%, 35%, 45%, 55%, 70% and 80%. The product is backed by a Lifetime Warranty that includes peeling, cracking, adhesive failure, and fading.

For more information on CXP or any of SunTek's product lines, please visit their re-designed website at www.suntekfilms.com or contact your nearest SunTek distributor.

Commonwealth Laminating & Coating, Inc / SunTek® Window Films is a manufacturer and distributor of professional automotive, architectural, and safety and security window films, as well as high-quality economy and specialty products.
